

Poplite™ veneer AB grade

Faces that may remain visible - ideal for any type of finishing (coatings, varnishes, etc).

May contain a few pin knots or healthy and live knots without cracks, small, well-done putty repair work that blends well with the rest of the surface & very light discoloration.

Poplite™ veneer B grade

Natural face with color variations and healthy knots, suitable for coating with laminates, paints or varnishes. May contain healthy, live knots up to 35mm diameter and small knotholes or cracks, so long as good repairs have been made. May also contain light discoloration and some limited glue stains and good repairs

Poplite™ veneer BB grade

Commercial face with putty work performed - ideal for non-visible uses and overlaying with laminates and veneers. May contain healthy knots up to 50mm diameter, small loose knots, cracks, bark and overlapping. May also include natural discoloration, glue stains, repairs and any form of putty work and repairs.

Poplite™ veneer C grade

Plywood face designed for packaging and similar uses. May contain all the natural wood characteristics and various processing defects, provided these do not compromise the functions of the plywood (e.g. the presence of fungi and metal parts is not allowed).
